

## Simplify, Secure, and Support Your Life After Settlement

When settling your case, you may have a lot of questions. It can be confusing, and you may not know what your responsibilities are. Luckily, Ametros can help ensure your life is simpler, your benefits are secure, and you are supported once you settle.

### Without Ametros

You'll have to handle bills yourself, know what Medicare covers, and pay the right fee schedule.

You need to set up a special account for MSA funds, separate from other accounts, that earns interest.

You must report how you spend these funds each year to the government or risk your future Medicare benefits.

You won't have access to your adjuster, nurse case manager, or your attorney once you settle.

### With Ametros & CareGuard

#### Simple

Our team helps you understand what can be paid with settlement funds. No need to worry about state fee schedules or bill errors - we handle it!

#### Secure

We create an FDIC insured bank account in your name, and our expert team submits all required reporting so your benefits are protected.

#### Supported

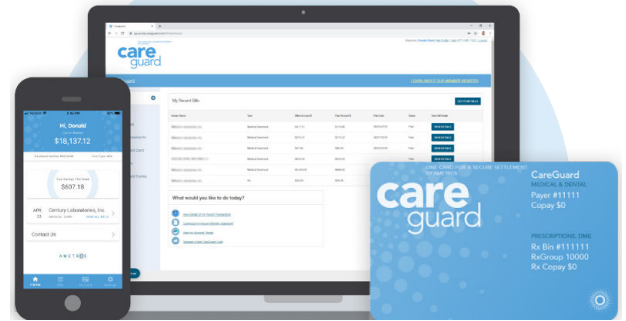

Our 75+ Care Advocates help with questions and support for medical equipment, provider relations, government benefits, prescriptions and more.

# Savings, Support, and Security After You Settle

CareGuard is Ametros' best-in-class professional administration service that manages your future medical funds after your workers' compensation or liability settlement.

In fact, Medicare **"highly recommends"** you use an administrator, like Ametros, to help you manage your funds after settlement.

## What Happens After You Settle

This can be a confusing and hard time, and you might not know what to do next.

With CareGuard, you can rest assured, knowing you have a team of experts by your side.

We take care of everything for you - paying your medical bills on your behalf, applying discounts on your treatments, and completing any required reporting.

## What Our Members Think

"I now have a life because of Ametros, and I cant thank them enough."
