

AMETROS AND STRUCTURED SETTLEMENTS

A safe strategy to preserve Medicare Set Aside settlement funds

PROFESSIONAL ADMINISTRATION

CareGuard is Ametros' professional administration service to assist in managing all types of future medical funds. CareGuard ensures injured parties are taken care of, making them feel more comfortable with the idea of settlement. With CareGuard, injured parties have access to:

- Savings on prescriptions and provider visits
- MSA reporting to ensure Medicare benefits are protected
- Support via email, chat or phone
- Full transparency of activity and savings through an online portal

STRUCTURED SETTLEMENTS

Ametros works with trusted broker partners to provide an extra layer of support and security to the injured party after they settle their case. A structured settlement is a stream of periodic payments paid to an injured party by the defendant primarily through the purchase of an annuity issued directly by highly-rated life insurance companies. All payments from a structure are tax free and can:

- Provide valuable protection to an injured party, in the case of a costly year
- Allow payment flexibility, tailoring the scheduled payments directly to the injured party's needs
- Ensure support for the injured party's medical care over the long-run

COMBINATION

The combination of professional administration and a structured settlement is the perfect pair to ensure injured parties are getting the best possible outcome for their life after settlement. The combination of these services in a costly scenario allows the injured party to access more coverage from Medicare and pay fewer dollars out of their own pocket. This is a great way for the injured party to preserve their settlement funds for as long as possible, and allow them to focus on their health rather than finances.
